Decisions about digital IDs, also called e-IDs, will be made across the board by all countries (193 UN member-states) within short, **or have already beer**

Subscribe

cases, like Switzerland, people will have a [illusion of] choice, they will be able to vote on the decision, see below.

In other countries, the governments, or those who pull the strings behind their governments, will take the decision without consulting the people.

A digital ID would be your last step to full enslavement – even if it is sold to you as a "benefit," an "all-in-one" ID, that allows you passage to everything. What it does not say is that this "passage" comes at a high cost of liberty. **It is granted only if you comply fully with the conditions of the e-ID and the linked QR code**.

It is an infamous **QR code** that follows you everywhere and controls every move you are making; and what's worse, it can block you from making any move, from using your money, from traveling, from simply living because it can impose on you a potentially harmful or deadly "vaccination" mandate (remember the covid vaxxes).

Stay away from ***any QR code*** as much as you can.

In other words, the e-ID requires complete compliance, complete obedience – complete submission. Only then, may it let you pass, buy what you want, and travel where you want.

Complete Submission by e-ID and QR Code

The WHO has now full authority to decide over any country's health sovereignty, including deciding on pandemics (*plandemics*, rather), imposing vaccinations, at their will. This applies to any country that has not opted out from accepting the revised IHR by 19 July 2025. Switzerland among many other WHO members (total 194) has not opted out. The new, revised IHR will enter into effect on 19 September 2025.

The United States, Austria, Italy, Serbia – and others – have opted out of the new revised IHR.

Therefore, if you can vote, say NO, a resounding NO, to the digital ID, the e-ID, as it may otherwise be your last chance to express your opinion freely.

Michael Yeadon's, former Vice President of Research, Pfizer Pharmaceuticals, short but concise and compelling statement about e-IDs.

In Switzerland, at its meeting on 21 May 2025, the Swiss Federal Council decided to put the the digital ID to a popular vote on 28 September 2025:

> Federal Act of 20 December 2024 on electronic identification and other electronic means of authentication (eID Act, eIDG) (FF 2025 20).

> [The Swiss digital ID referendum held on 28 September 2025 resulted in a **narrow approval** of the Federal Act on Electronic Identification Services (e-ID Act), with **50.4% voting in favor** and 49.6% against. The turnout was approximately 49.55%. - Source: Brave AI Search]

The e-ID may be your last step to enslavement from where any escape may be literally impossible.
